

“ The only way a company like Linn can prosper in a cut-throat marketplace is through a faster design process which delivers products that are demonstrably superior. **FLOTHERM** helps us achieve this goal ”

Martin Dalgleish, Head of Commercial Affairs, Linn

**Linn** is an independent precision engineering company specialising in high-quality sound reproduction. Their entertainment systems can be found throughout the world in royal residences, luxury homes and in Aston Martin motorcars. Linn are the leading supplier of multi-zone entertainment systems to the Superyacht industry, where Linn systems have been proven in the harsh

maritime environment for over a decade. Linn use FLOTHERM software in the design of their power amplifiers, where rapid and efficient dissipation of heat is an essential factor in the ultimate performance of the system. FLOTHERM enables their mechanical engineers to optimize the performance of critical heatsink designs to ensure that Linn's products are compact and reliable.
